Year 1 maths – Summer 2 Week beginning: 01.06.20

Theme	Lesson 1 (of 5) Sharing	Lesson 2 (of 5) Finding halves and quarters	Lesson 3 (of 5) Finding halves and quarters	Lesson 4 (of 5) Counting to 100	Lesson 5 (of 5) Counting to 100
Factual fluency (to aid fluency)	Doggy division	Halves Select halves and then halves to 10	Fraction game	Find a number Select direct, 1 to 50	Basketball Select numbers up to 49
Problem/ activity of the day

Remember, just like in class, you can still show the depth of your knowledge LINK | (Lesson 1 resources below) MAKING LINKS:

Last week we were looking at halves and quarters and how we can rearrange quantities.

THINK: (support below)

Can you help me with this problem?

Four people need to share a box of 12 chocolates.

How many chocolates will they get?

Finished? Explain how you worked that out to a family member.

SEE: (model below) SEE model below

DO: Use what you have learnt today to solve the problems below. | (Lesson 2 resources below) MAKING LINKS:

Yesterday we learnt to find half of a set of objects.

THINK: (support below)

Can you help me with this problem?

My friend has 6 coins. They say I am only allowed half of the coins.

How many coins will I get?

Finished? Can you half the coins again to find a quarter? Is this possible?

SEE: (model below) SEE model below

DO: Use what you have learnt today to solve the problems below. | (Lesson 3 resources below) MAKING LINKS:

Yesterday we learnt to find one half and one quarter of a set of objects.

THINK: (support below)

Can you help me with this problem?

My friends have two different opinions about a shape.

How can I work out which one is correct?

Finished? Show me the other ways you could split a rectangle into quarters.

SEE: (model below) SEE model below

DO: Use what you have learnt today to solve the problems below. | (Lesson 4 resources below) MAKING LINKS

In year one we have made numbers using tens and ones. We have also learnt how to count in 10s.

THINK: (support below)

Can you help me with this problem? My friend has some coloured pens. How many pens do they have?

Count in 10s. Keep counting in 10s to 100.

Finished? Count forwards in ones to 100 from any number.

Count backwards from 100 in ones to any number.

SEE: (model below) SEE model below

DO: Use what you have learnt today to solve the problems below. | (Lesson 5 resources below) MAKING LINKS:

Yesterday, you learnt to count to 100 using tens and ones.

THINK: (support below)

Can you help me with this problem?

My friend has made some numbers out of tens and ones.

What numbers have they made?

Use your tens and ones from yesterday to solve this problem.

Finished? Write an addition equation for each number.

SEE: (model below) SEE model below

DO: Use what you have learnt today to solve the problems below. |
| Methods, tips, clues & checks | See answer sheet below. | See answer sheet below. | See answer sheet below. | See answer sheet below. | See answer sheet below. |

See below for resources to support you to THINK-SEE-DO

Quality First Education Trust

THINK:

SEE:

I gave each person one chocolate at a time until there were no chocolates left in the box.

Laura

Sam

Daisy

Mike

Each person gets 3 chocolates.

DO:

half

1. Gather 20 items around your house (such as toys, pasta or Lego.)

2. Try and share the items so that you and a friend have half each.

3. Share these amounts: 8, 10, 12, 18 and 20

Example:

I have 20 pieces of pasta.

I have 10 and my friend has 10. Half of 20 is 10.

Quality First Education Trust

THINK:

SEE:

I shared the coins one at a time into each group.

Me	My friend

Each person gets 3 coins.

To find one quarter of the coins, I would need to share them between four people, or I could half the coins again.

Me	My friend
My second friend	My third friend

It isn't possible to find one quarter of 6 coins. The groups are not equal.

DO:

There are 18 windows.
Half of them get smashed by a football.
How many of them are smashed?
There are [ ] smashed windows.

There are 16 butterflies.
One **quarter** of them fly away.
How many butterflies fly away?

[ ] butterflies flew away

There are 22 books.
Laura reads **half** of them.
How many books are not read?
There are [ ] books left to read.

There are 28 balloons.
The clown gives a **quarter** of them away.
How many balloons does he give away?
[ ] balloons were given away.
Quality First Education Trust

THINK:

Laura thinks that this shape is split into quarters because there are four parts.

Daisy disagrees and thinks this shape is not split into quarters because they are **not equal**.

SEE:

The best way to understand this question is to cut the shape along the lines. This helps us to see whether the parts are equal.

When I line them up side by side, I can see that they are **not equal.**
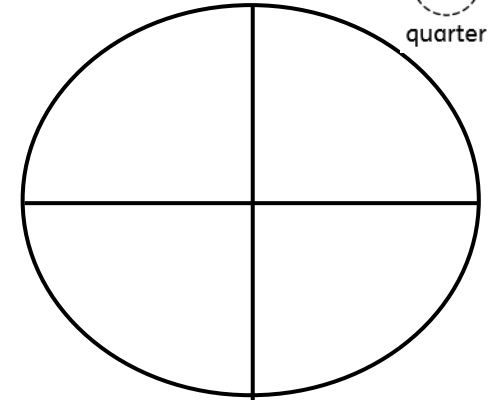

It's also helpful to put them on top of each other to see that they are not equal.

Daisy is correct.

DO:

Colour in **half** of the shape

half

Colour in one **quarter** of the shape

quarter

There are 16 peppers.
Half of them are red.
How many peppers are red?

There are [ ] red peppers.

There are 20 shirts.
One **quarter** of them are blue.
How many shirts are blue?

There are [ ] blue shirts.

THINK:

SEE: **Group and count in tens**   **10 ones = 1 ten**

10   20

There are 20 pens.

10   20   30

Now let's keep counting in 10s.

10   20   30   40

10   20   30   40   50

Keep counting in 10s to 100

DO:

1. Make 9 tens sticks and 9 square ones out of paper.

2. Make a number between **80** and **90**.
    Example: 82

3. Make that number using your tens and ones.
    Example:

4. Count on from the number you have made to 100.
    Example: 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100

5. Try using these numbers.

91   **93**   **85**   **88**

Quality First Education Trust

THINK:

SEE:

Count in tens and ones.

60 and 7

Make 67

67

67

60 7

61 62 63 64 65 66 67

10, 20, 30, 40, 50, 60, 61, 62, 63, 64, 65, 66, 67

70 and 6

Make 76

76

76

70 6

71 72 73 74 75 76

10, 20, 30, 40, 50, 60, 70, 71, 72, 73, 74, 75, 76
DO:

Draw then circle to make 10.

☐ Tens= ☐

Count in 10s

10 20 30 40 50 60

70 ☐

Count in 10s

10 20 30 40

50 60 ☐
Draw **58** in tens and ones.
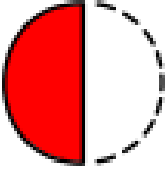

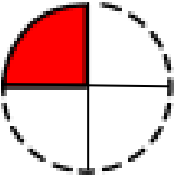

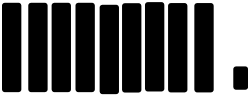

☐ tens and ☐ ones

make ☐

Draw **91** in tens and ones.

☐ tens and ☐ ones

make ☐

Quality First Education Trust

Answers

Day 1	Half of 8 = 4 Half of 10 = 5 Half of 12 = 6 Half of 18 = 9 Half of 20 = 10
Day 2	9, 4, 11, 7
Day 3	8 red peppers 5 blue shirts
Day 4	91 = 9 tens and 1 one 91, 92, 93, 94, 95, 96, 97, 98, 99, 100 93 = 9 tens and 3 ones 93, 94, 95, 96, 97, 98, 99, 100 85 = 8 tens and 5 ones 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100 88 = 8 tens and 8 ones 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100
Day 5
