| Year 2 maths - Summer 1 Week beginning: 11.5.20-Time |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Theme | Time lesson 6 <br> Finding durations of time | Time lesson 7 <br> Finding durations of time | Time lesson 8 <br> Finding ending times | Time lesson 9 <br> Finding starting times | Time lesson 10 Comparing time |
| Factual fluency (to aid fluency) | Read and write clock times | Read and write clock times | Time words: o'clock, half, quarter | Months of the year | Read a calendar |
| Problem/ activity of the day | (Lesson 1 resources below) <br> MAKING LINKS: Last week you learnt how to tell and write the time to 5 minutes. <br> THINK: (support below) <br> Can you help me with this problem? In 30 minutes the train will reach London Bridge. In 1 hour the train will reach Morden. What time will it be when the train reaches London Bridge? What about Morden? <br> SEE: (model below) <br> Watch this clip to see how to find what time the train reaches the stations. <br> DO: Use what you've learnt to match the clocks and write down the correct times in the table. <br> Challenge: If now it is 2 o'clock, what time will it be in 65 minutes? | (Lesson 2 resources below) MAKING LINKS: Yesterday we learnt how to find the end time given the start time and the duration in 30 minute and hourly intervals. <br> THINK: (support below) <br> Can you help me with this problem? How can we tell how long took Holly to paint? <br> SEE: (model below) <br> Watch this clip to see how to find the duration of an activity. <br> DO: <br> Use what you've learnt to find the duration (how many minutes) and write the time. <br> Challenge: George starts writing a story at 5 o'clock and finishes writing at half past six. How long did it take Tom to write? | (Lesson 3 resources below) MAKING LINKS: Yesterday we learnt how to find the duration of an activity knowing what time it started and ended. <br> THINK: (support below) <br> Can you help me with this problem? Tom's favourite show starts in 2 hours. John's favourite show starts in 30 minutes. What times do their favourite shows start? <br> SEE: (model below) <br> Watch this clip to see how to find ending times. <br> DO: Use what you've learnt to draw the missing hour and minute hands. <br> Challenge: If now it is $2: 25$ in the afternoon. What time will it be in 1 hour and 20 minutes? | (Lesson 4 resources below) MAKING LINKS: Yesterday you were learning how to find the end time, given the start time and the duration. <br> THINK:(support below) <br> Can you help me with this problem? Alphie just had a 30 minute break. This is the time on his clock now. What time did the break start? <br> SEE: (model below) <br> Watch clip 1 and clip 2 to see how to find start times. <br> DO:Use what you have learnt today to solve the problems below. <br> Challenge: What is the start time 1 and a half hours ago if the time is $11: 00$ ? | (Lesson 5 resources below) MAKING LINKS: Yesterday you were learning how to find the start time, given the end time and the duration. <br> THINK:(support below) <br> Can you help me with this problem? How long did each activity take? Which activity took the longest amount of time? <br> SEE: (model below) <br> Watch this clip to see how to compare different amounts of time. <br> DO:Use what you have learnt today to solve the problems below. <br> Challenge: Make up your own problem which involves comparing time. Get an adult in your household to solve it! You could include pictures and diagrams. |
| Methods, tips, clues\& checks | Day 1 resources and answers (below) Optional: Use this clock to help you find your answers. | Day 2 resources and answers (below) Optional: Use this clock to help you find your answers. | Day 3 resources and answers (below) Optional: Use this clock to help you find your answers. | Day 4 resources and answers (below) Optional: Use this clock to help you find your answers. | Day 5 resources and answers (below) Optional: Use this clock to help you find your answers. |

## THINK:

It is now:

In 30 minutes the train will reach London Bridge.
In 1 hour the train will reach Morden.
What time will it be when the train reaches London Bridge?
What about Morden?

## SEE: Optional video

After 30 minutes the minute hand moves from 12 to 6 .
The time shown is 30 minutes after 3 o'clock.
The train reaches London Bridge at half past 3.
*To find the time, we need to count in 5 s forwards until we get to 30 . Remember we are counting from the minute hand.

The minute hand makes a complete round in 60 minutes. The hour hand moves from 3 to 4 . 1 hour after 3 o'clock is 4 o'clock. The train reaches Morden at 4 o'clock.

DO: 1) Match.

THINK: How can we tell how long took Holly to paint?

SEE: Optional video
Method 1

From 5 past to quarter past is $\mathbf{1 0}$ minutes. From quarter past to quarter to is $\mathbf{3 0}$ minutes. 10 minutes +30 minutes $=40$ minutes

1 know from 2 o'clock to quarter to 3 there are 45 minutes. However I want to find the duration from 5 past two so:

$$
45-5=40
$$

It took Holly 40 minutes.

| Start time | 15 minutes later | 40 minutes later |
| :---: | :---: | :---: |
| Quality First Education Trust |  |  |

THINK: Tom's favourite show starts in 2 hours.
John's favourite show starts in 30 minutes.
What times do their favourite shows start?
 ـ

## SEE: Optional video

Tom:

1 hour has 60 minutes. In one hour the long hand turns a full circle and the short hand points at the next hour.
The time now is 1 o'clock, two hours later it will be 3 o'clock. John:

Remember we are counting in 5 s forwards until we get to 30 , starting counting from the minute hand.

DO: Draw the missing minute and hour hands.

A television programme starts at 8:30 in the evening. The programme lasts for two hours. Write the correct time and draw the hands.

THINK: Can you help me with this problem? Alphie just had a 30 minute break. This is the time on his clock now. What time did the break start?

## SEE:

1) What was the time 30 minutes ago? Optional video link

2) What would the time be an hour ago? Optional video link

DO:Draw the missing hour and minute hands on the clock to show the start time.

Quality First Education Trust

THINK: How long did each activity take? Which activity took the longest amount of time?

The children do their homework.

The boy takes a bath.

1) Find the start time
2) Find the end time
3) Calculate the duration of time

SEE: Optional video link

$$
\text { 5:30 or half past } 5
$$

I can count around the clock in my 5s to work out how long the children were doing their homework. They started at 5:00 and finished at 5:30. They spent 30 minutes doing their homework.

I can count around the clock in my 5 s to work out how long the boy took a bath for. He started at 6:30 and finished at 6:45. He spent 15 minutes in the bath.

The homework took the longest amount of time because the children spent 30 minutes doing this. The boy only spent 15 minutes in the bath. 30 minutes is longer than 15 minutes.

## DO: Fill in the blanks.

The children did the following activities one day:

Harry did his homework.
Start time: $\qquad$
End time: $\qquad$

Duration (length): $\qquad$

Josh played with his toys.
Start time: $\qquad$
End time: $\qquad$

Duration (length): $\qquad$
a) Which activity lasted the longest? $\qquad$
b) Which activity was the shortest? $\qquad$
Top tip: To find the duration of time, remember to start counting the minutes from where the minute hand is pointing on the first clock. Count around in your 5s until you get to the end time.

Day 2

| Start time | 15 minutes later | 40 minutes later |
| :---: | :---: | :---: |
|  | 3:45 | 4:10 |
|  | 3:00 | 3:25 |

DO: Draw the missing minute and hour hands.

A television programme starts at 8:30 in the evening. The programme lasts for two hours. Write the correct time and draw the hands.

DO: Draw the missing hour and minute hands on the clock to show the start time.

Day 5
DO: Fill in the blanks.
The children did the following activities one day:

Harry did his homework.
Start time: 1:00 or 1 o'clock
End time: 1:25 or 25 minutes past 1
Duration (length): 25 minutes

Josh played with his toys.
Start time: 4:15 or quarter past 4

End time: 5:00 or 5 o'clock
Duration (length): 45 minutes
a) Which activity lasted the longest? Josh playing with his toys.
b) Which activity was the shortest? Harry doing his homework.

Top tip: To find the duration of time, remember to start counting the minutes from where the minute hand is pointing on the first clock. Count around in your 5 s until you get to the end time.
